# Ashfield Inside Sales Solutions

Innovative, cost-effective ways to increase sales and drive brand awareness

## Inside Sales is an increasingly popular way for pharmaceutical and healthcare companies to target customers in a more holistic way, supplementing traditional field representatives.

Most commonly, inside sales involves highly-trained sales reps interacting with healthcare professionals via phone (tele-detailing) or a web-based platform (interactive e-detailing).

These channels can be implemented at any stage of the product lifecycle to complement field teams, reinforce product messages, reach hard-to-access areas and promote mature brands without additional field reps.

**Our Inside Sales reps are leveraged to support different brand channel strategies:**

### Amplification

Increase frequency in addition to face-to-face calls on the same targeted customers

### Expand

Extend reach with non target, lower tier or geographically dispersed customers. Also, potentially 'no see' target doctors

### Partial frequency optimization

Reduce and replace face-to-face customer call frequencies with remote channel 1:1 contacts on target customers in order to maintain customer engagement

### Partial segment optimization

Reallocate face-to-face calls on a segment of previously targeted customers in order to maintain customer engagement for a late growth/mature brand

### Full optimization/substitution

Reallocate face-to-face on all customer segments with service team and remote e-detail channels integrated with digital channels/services

### Re-promotion

Re-engage with a segment of customers that are not currently being promoted to in order to deliver new messages or increase share of voice

# 1

## INTERACTIVE E-DETAILING

Like tele-detailing, but these reps communicate with healthcare professionals via a web-based platform in order to share visual information on products.

# 2

## VACANCY MANAGEMENT

A personal and effective staffing solution that reduces the risk and costs associated with fixed-term headcount recruitment.

# 3

## TELE-DETAILING

Trained reps interacting with healthcare professionals over the phone to educate customers and promote products.

# 4

## PHARMACY CAMPAIGN SUPPORT

Leverage the phone for your patients and HCP customers with the pharmacy. This key stakeholder is accessible by phone and an Inside Sales rep will reach >75% of pharmacists daily. An ideal solution for; new indications, formulary updates, pricing information, and patient support materials

# 5

## HYBRID REPRESENTATIVES

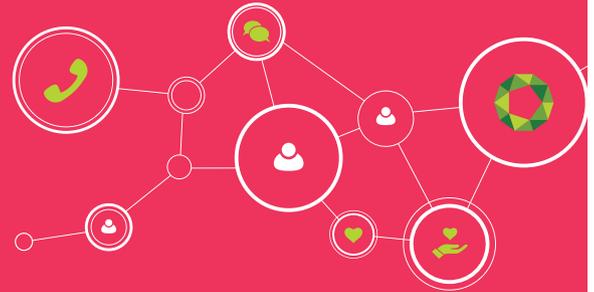

Multi-skilled reps working effectively across larger territories by using a blend of communication channels, including face-to-face meetings, tele-detailing and interactive e-detailing.

# 6

## STAKEHOLDER REPRESENTATIVES

Expert customer service teams handle customer queries, process product orders and reinforce a positive experience of the brand, helping to ensure long-term customer satisfaction and retention.

# 7

## CONCIERGE

A great asset to sales teams, the concierge service sets appointments, takes requests for promotional material, recruits healthcare professionals to meetings and does a lot of the background work that allows reps to get on and do what they do best.

# Why choose Ashfield?

We are a trusted, experienced, international contact center partner of choice, with outstanding operational standards and track record. We bring our clients responsive, multichannel services that are proven to grow sales and promote brand awareness.
